

NEW DOT 5.1 HI-TEMP 570 RACING BRAKE FLUID

FEATURES:

- Wilwood's 570 is now a DOT 5.1 rated brake fluid
- Maintains its 570° F dry boiling point
- Lower viscosity makes bleeding easier
- Resists aeration and foaming
- Ideal for ABS and stability control equipped cars

Wilwood Hi-Temp 570 racing brake fluid has been widely used in the extreme environment of auto racing for decades, and the improved DOT 5.1 rated formula is even better. It has been proven to work, lap after lap, with no loss of braking or increased pedal travel despite severe heat.

A high boiling point is only the beginning. The low viscosity of the new DOT 5.1 rated formula lets the modern car's ABS, electronic stability control systems, and brake-based limited-slip systems react faster. It also makes bleeding the brakes quicker and easier.

Hi-Temp 570 also improves resistance to aeration and foaming, which lead to bubble formation. No bubbles means improved pedal feel in severe use.

Available in convenient 12-ounce, hermetically sealed bottles to prevent moisture absorption. Open containers should be used right away or stored only for short periods of time with a secure cap and an air-tight zip-top or heat-sealed vacuum bag.

**NEW
TECHNOLOGY!**

Note: Wilwood Hi-Temp 570 racing brake fluid is DOT 5.1 rated and compatible with other DOT 3, DOT 4, and DOT 5.1 fluids.

DO NOT USE WHERE SILICONE DOT 5 FLUID IS SPECIFIED.
